

LPC Washer Thermocouple Technical Information

Introduction

This Rugged washer thermocouple with flexible leads is used for fixed surface temperature measurement. It is available to suit bolt sizes M3.5, M6, M8 or M10. It is ideal for permanent fixed surface measurement of a variety of materials, such as pipes, castings or metal work where a bolt, rivet or screw can be applied and is easy to install.

Ordering Procedure

Specify: Type: K, J or T thermocouple
 M3.5, M6, M8 or M10

Construction

With 2 mtrs of flexible glass fibre insulated, stainless steel over braided, stranded thermocouple lead wire as standard. Suitable for use up to 400°C and comes complete with 50mm long tails. It can be made to any length to suit your application where longer cable runs are required.

Application

- Engine & Bearing Housings
- Surface Measurement
- Automotive

Specification

Product	Washer Thermocouple
Type	K, J or T
Temp Range	-50 to + 400°C
Length	2 metres or to order
Bolt size	M3.5, M6, M8 or M10
Material	Brass Washer
Termination	Stripped leads or optional plugs
Accuracy	Class 1
